

# Scratching CDs

## Items needed (quantity per creation)

- 1x CD
- Black acrylic paint
- Pencil
- Nail (or fingernail)
- Paint brushes

## Optional

- Other coloured acrylic

## Instructions

1- Get your CD and paint it completely black, set it aside to dry. You may want to add a second coat but keep in mind the more coats the harder it will be to scratch off.

2- Once dry use a pencil to lightly draw on a design

3- Use your nail to scratch away the paint where you want to expose the mirror below.

## Alternatively

For something different try another colour or even a pattern, keep in mind that dark colours will usually look better with the mirror below.
