

Christmas Card Garland

Items needed (quantity per creation)

- String
- Old Christmas cards (or coloured card)
- Hot glue (or PVA)
- Pencil

Optional

- Textured scissors
- Embellishments
- Glitter

Instructions

1- Draw around a bottle lid or circular object then cut around. You will need at least four of these to create a decoration. (Note this object will need to fit inside a card and will be the final size of your decorations.)

2- Fold each of the circles in half and glue two together, then repeat with the final two.

3- Place the string you wish to use through the middle of the two constructed pieces and glue them together, encasing the string inside.

The more the merrier.

When making your decorations why not experiment with more circles. The one in the front in the top image was made with eight. The more you use the fuller it looks.
