

Jar Nebula

Items needed (quantity per creation)

- 1x Jar (plastic or glass)
- Cotton wool (enough to pack each jar)
- Paint (acrylic or tempera) very slightly watered down
- Glitter
- Kebab stick

Optional

- Sequins
- Metallic Paint
- PVC (electrical tape)

Instructions

1- First get the jar clean and remove the label if it has one. Soaking a jar in warm water with dishwash should be the trick, or you can try vinegar mixed with baking soda, or de-solv-it (this can be brought at New World supermarkets or Mitre 10/ Bunnings)

2- Start by putting in a little bit of paint into the jar, add some glitter (or embellishments of your choice) then some cotton wool, only enough wool to fill about a quarter of the jar.

3- Then add water, only fill the jar to just below the top of the cotton wool (if you overfill at this stage the colours may run too much)

4- Repeat steps two and three, three more times.

5- Once fill use a kebab stick to slightly move the paint to suit. Put on the lid and admire your creation

Tips

- When filling the jar with paint water and cotton wool its best to keep it in one place, moving the jar from station to station may result in a jar being dropped and a horrible mess.
- Also once the lid is on you may want to wrap around the lid opening with a few layers of coloured PVC tape, this should prevent the jars leaking.
