

# Rice Starfish

## Items needed (quantity per creation)

- Pencils
- Card (plain or coloured) A5 per creation
- Rice
- PVA
- Paint

## Instructions

1- Start by drawing (or tracing the templates below), then cut out your starfish base.

2- Add PVA along the center line of each arm and cover with rice.

3- Once dry, shake off extra rice (this can be reused for other crafts). Then paint the whole starfish your favorite tropical colour.

## Alternative

Why not add some creativity and try other designs and different colours on your starfish? Try using different techniques like using the end of a straw as a stamp or use hardly any paint on the brush and dry brush only the rice.
