

Flat Straws

Items needed (quantity per creation)

- Straws
- Iron
- Scissors
- Baking paper

Instructions

1- Assemble straws in the desired pattern and then place between two layers of baking paper.

2- With the iron on 'cotton' setting, iron the straws till they are flat. Leave to cool before removing the baking paper. That's it to make the basics, below are a few other options.

Options

Make it longer

If you want to make it longer then simply alternate the straws. Then you can carry on as long as you wish. This is good for creations like bracelets.

Stick it together

You can iron multiple layers together and they will stick. This is good for creations like photo frames.

Make it different

If you want a different look you can cut small pieces of straws shorter than 5mm then iron them together. This will give a cool mottled look. Then you can cut it to whatever shape you
