

Glitter Jars

Items needed (quantity per creation)

- Jar
- Packet of glitter
- Clear glue (about 1/4 of the jar size)
- Water

Optional

- Sequins, embellishments etc.

Instructions

1. Fill the jar 3/4 with water
2. Add in your glitter (this craft does use a bit of glitter and this example a whole small bottle was used). You may also like to add other embellishments at this point if wanted.
3. Top up your jar with the clear glue, this is to slow the glitters movement making it swirl for longer.
4. Tightly secure the lid. Shake the jar and then watch it swirl.
