

Spy In Training

Items needed (quantity per creation)

- 1 Jar (plastic is best as it needs to be shaken)
- Coloured card
- Pen/felt tip
- Rice (quantity depends on size of jar)
- Items to place into rice (In this example different shaped beads were used)
- Hot glue or PVA

Instructions

1- Half fill the jar with rice then add in the items to be found. Remember to write down what you put in as it will be easier now then to try remember once its closed.

2- Fill the jar so its 1cm from the top and close the lid. Check it has enough movement then if you're happy, glue the lid shut. This will stop the lid coming open while using and rice going everywhere.

3- Add a piece of card to the back of the jar or the base and write on it whats in the jar to find. You can cover the lid with coloured card and embellishments if you wish.

How to play

There are many ways this game could be played. One of the options would be to use a timer to see how long it takes to find all the objects. Or it could be played with pairs and each player picks an item the other person has to find and then they time how long it takes them to find it.
