

# Straw Necklace

## Items needed (quantity per creation)

- 5 straws cut into different sized pieces (17 pieces used here)
- Beads
- Wire, nylon or anything like string
- Scissors
- Thick needle

## Instructions

1- Begin by laying out how you would like your final product to look. Cut extra straws as required. The straws can be a little sharp on the pointy ends, so you will want to slightly round the sharp point with scissors or on sandpaper.

2- Using your needle, make a hole in the top of each piece of straw. Thread straws and beads onto wire/nylon in your desired pattern.

3- Secure the ends by either tying or using a jewelry clasp.

## Alternative

A necklace may not be what every child wants to make so below is an alternative project. The photo frame uses step one from above then simply glue as desired onto card frame.
