

# Straws Flying High

## Items needed (quantity per creation)

- 1 straw (if your straw has a bendable piece cut this off)
- 1 x 30cm (approx) length of card 1cm (approx) wide
- 1 x 15cm (approx) length of card 1cm (approx) wide
- Hot glue or sellotape

## Instructions

1- Take the 30cm length of card and make a loop. Secure with hot glue or tape

2- Repeat step one with the 15cm length of card.

3- Using hot glue or tape secure to the ends of the straw. Make sure they are both attached to the same side of the straw like the picture.

## Take this activity further

This activity is very simple but if you want you can take it further by making bigger loops, same size loops, more loops, more straws and see what happens when they fly.
