

Zen Garden

Items needed (quantity per creation)

- 2x Kebab sticks
- Peg
- Hot Glue
- Photo frame (or tray of some description)
- Sand

Optional

- Embellishments

Instructions

If you are using a tray instead of a photo frame then start at step 3.

1- Take your frame and remove the glass and card inside, then turn the backing upside down and fix back in place.

2- Use hot glue to seal the edges so your sand may fall through the base.

3- At this point, you may wish to decorate your frame/tray. Then take your peg and attach a kebab stick to the centre using hot glue. This will become the handle of your small rake.

4- Cut your last kebab stick into pieces and then attach them to the front of the peg. These will become the rake prongs.

5- Fill your frame/tray halfway with the sand. If you want you could make other items to add to the garden such as rocks, shells, twigs etc. Enjoy the relaxing raking of your very own zen garden.
