

# Woven Washer Bracelets

## Items needed (quantity per creation)

- Ribbon approx 30cm
- Washers

## Instructions

This activity is a little harder and better suited for older children, however young children can do this too, they will just need more help until they get the hang of it.

1- Thread two washers onto the ribbon about 1/4 of the way from the left.

2- Take the right long end and thread it back through the washer to the left.

3-Then with the washers sitting flat on each other thread the long end back through the right washer. Continue on by adding another washer and repeating steps two and three until desired length is reached.

## Where to find it

Washers can be easily found for cheap at many discount stores/\$2 shops. You can also get them from hardware stores but unless buying in bulk they tend to be more expensive.
