

# Carnival Masks

## Items needed (quantity per creation)

- Card
- Kebab stick/elastic - depends how you plan to wear it
- Hot glue
- Embellishments
- Ice block sticks

## Instructions

1- Trace and cut out your chosen mask template. Then either attach a stick to the side using hot glue (this is if you want to hold the mask up) or thread the elastic through the holes so the mask will fit around the head (this is if you want to wear the mask without holding it)

2- DECORATE - Add feathers, glitter, sequins... pretty much anything to make your mask bold, glittery and colourful like the Brazilian carnival masks.

3- This step is only if needed. Some card when loaded up with decorations will bend or fold, use the ice block sticks to strengthen the mask see image.

Now you're ready for the carnival.
