

Doily Eggs

Items needed (quantity per creation)

- Doilies
- Dye or watered down acrylic paint
- Scissors
- Glue
- Card

Optional

- Embellishments

Instructions

For this example, the doily egg has been added to a card however it could be used in many other situations like decoupage, decorations or even just as it is.

- 1- Take your doily and dip it in water to get it damp, this will help the dye/paint run and spread. Use a small brush or the end of a chopstick to add spots of colour to the doily. Start with one colour then continue to add until you are happy with your design and set aside to dry.
- 2- Once dry take your doily and trim off the sides so you get an egg shape.
- 3- Add your egg to a card and decorate.
