

# Geometric Sculptures

## Items needed (quantity per creation)

- Pipe cleaners
- Straws
- Scissors
- Ruler

## Instructions

- 1- Cut straws to different lengths. Five x 10cm, 10 x 5cm lengths. Then thread a pipe cleaner into one of your 5cm straws. Keep threading straws to make a five-sided shape (pentagon).
- 2- Thread two more straws onto the pipe cleaner. When you run out of pipe cleaner attach another by twisting on to the original.
- 3- Thread the pipe cleaner through one of the adjacent straw joints bend upwards to begin to form your pyramid.
- 4- You will need to thread pipe cleaner back up through the straw to make the next angles. Continue until you have five points to your pyramid.
- 5- Repeat steps four to six until you have formed the top of your shape with the 10cm straws. You can now play around with making more complex sculptures.
