

Passports

Items needed (quantity per creation)

- Coloured card
- Plain copy paper
- Stapler
- Scissors
- Photo
- Pen

Instructions

1- Print the attached template double sided on a printer using setting 'flip long edge'. Then fold along the fold line so "passport" is on the front.

2- While folded, cut around the cut line. Then take 2-3 pieces of copy paper (you can add more but it will need to be cut separately). Fold in half and staple on the left hand side. Then use the pre-cut cover as a template to cut the pages to the shape of the passport.

3- Take a photo and print it black and white, then cut out and glue on the left hand side of the front inside page. Use the pen to fill in the details including the bottom code part in-between the <<<'s.

Then you can use this little note book to record where you travel in the around the world theme.
