

Pick-up sticks

Items needed (quantity per creation)

- Kebab sticks
- Decorative tape
- PVA
- Brush
- Polystyrene or box

Instructions

- 1- Get your first kebab stick. Select a tape colour and wrap it around the stick.
- 2- Repeat step one till you have the look you want for your pick-up stick.
- 3- Repeat steps one and two, 15+ more times. Once you have all your pick up sticks coat each one with PVA glue, it only needs to be thin. This is to stop the tape unravelling. Don't put glue on the tapered end as you will need to push this into polystyrene or a box to dry.

Gameplay

Place all the sticks in your hand straight up, resting on the table. Remove your hand and let them fall into a pile. Players then take turns to pick up sticks one at a time. If a player picks up a stick without making other sticks move then they get to keep that stick and have another turn. If other sticks move when they pick up that stick is returned to the pile and it's the next player's turn.
