

Pipe Cleaner Hand Puppet

Items needed (quantity per creation)

- Pipe cleaner
- 2x Styrofoam balls (pom poms will work too)
- Google Eyes
- Embellishments
- Sharpies or Paint
- Hot glue

Instructions

- 1- Begin by measuring your pipe cleaner, you will want it to be long enough to wrap around two fingers with two centimetres spare at the ends to thread into the styrofoam balls.
- 2- Push your styrofoam balls onto the end of the pipe cleaner. These will become the eyes. You may want to colour these before attaching them. Glue the googly eyes onto the styrofoam balls.
- 3- Add embellishments. In this example, I used feathers to make eyelashes, use your imagination and embellish to your hearts content.
